

More Precision

colorSENSOR // True Color Measuring Systems

	For metals, plastic parts, thread locking, coating or packaging
	For individual surfaces, direct reflection incl. gloss
	Ideal for part recognition, sorting tasks, presence control, color inspections
	Detection of the smallest of objects from 0.8 mm
	Working distance > 300 mm (for reflective surfaces)

With the reflex sensor, the light emitted by the controller is sent at 0° (parallel) to the surface of the part to be tested. Both diffuse and directly reflected portions are present in the back reflex (surface color + surface gloss). The reflected light components of the sample are also detected by the sensor at 0° (parallel) to the surface and transmitted to the controller via an optical fiber. The sensors are available for different working distances and spot sizes. Other versions in other lengths or temperature ranges are optionally available.

The reflex sensor, combined with the performance of the CFO series, provides even more precise differentiation of the surface characteristics of materials. The measurement arrangement in the reflex sensor of transmitter and receiver in $0^\circ:0^\circ$ allows a quality control not only by color but also in combination with the reflection properties of the surfaces of the product. This is needed, for example, when sorting different materials such as stainless steel, steel, tin, zinc, aluminum, brass, gold or other colored parts.

Due to the standard FA connection, the optical fiber is also compatible with other controllers (previous series such as LT or WLCS). The reflex sensor offers many advantages in terms of performance and installation possibilities. Due to the external controller, less installation space is required at the measuring point.

Measurement geometry

Reflex sensor $0^\circ:0^\circ$

The CFS4 sensors are suitable for color measurements of numerous surfaces such as plastics or metal.

Model		CFS4-A11	CFS4-A20	CFS4-C10	CFS4-C20
Part number		10810487	10810351	10810383	10810568
Type of sensor		Reflex sensor			
Working distance ¹⁾	Start	5 mm	5 mm	5 mm	5 mm
	Optimal	5 mm	5 mm	5 mm	5 mm
	End	15 mm	20 mm	15 mm	20 mm
Measurement spot diameter ¹⁾	Start	8 mm	10 mm	8 mm	10 mm
	Optimal	8 mm	10 mm	8 mm	10 mm
	End	22 mm	28 mm	20 mm	28 mm
Light spot diameter ¹⁾	Start	10 mm	12 mm	8 mm	12 mm
	Optimal	10 mm	12 mm	8 mm	12 mm
	End	24 mm	30 mm	26 mm	30 mm
Repeatability in rotation ^{1) 2) 4)}		$\Delta E \leq 1.2$	$\Delta E \leq 0.6$	$\Delta E \leq 1.8$	$\Delta E \leq 0.6$
Measurement geometry		0°/0°			
Min. target size (flat)		Ø 8 mm	Ø 10 mm	Ø 8 mm	Ø 10 mm
Minimum curvature radius of target (curved)		80 mm	100 mm	80 mm	100 mm
Sensitivity	Distance ^{1) 4)}	< 13.3 ΔE / mm	< 10.4 ΔE / mm	< 13.0 ΔE / mm	< 10.4 ΔE / mm
	Tilt angle ^{1) 4)}	< 0.3 ΔE / °			
	Ambient light ^{1) 4)}	< 0.3 ΔE / 1,000 lx			
Permissible ambient light ^{1) 4)}		< 40,000 lx		< 16,000 lx	< 40,000 lx
Max. tilt angle ^{1) 4)}		±45°			
Connection		integrated fiber-optic cable (axial) with metal-silicone (T) sheath, standard length 1.2 m; other lengths 0.3 m ... 2.4 m optionally available		integrated fiber-optic cable (axial) with metal (M) sheath, standard length 1.2 m; other lengths 0.3 m ... 2.4 m optionally available	integrated fiber-optic cable (axial) with metal-silicone (T) sheath, standard length 1.2 m; other lengths 0.3 m ... 2.4 m optionally available
Mounting		FA (M18x1)			
Temperature range	Storage / operation	Sensor head: -10 ... +80 °C; Cable: -60 ... +180 °C		Sensor head: -10 ... +80 °C Cable: -40 ... +300 °C	Sensor head: -10 ... +80 °C Cable: -60 ... +180 °C
Humidity		20 ... 80 % r.H. (non-condensing)		20 ... 60 % r.H. (non-condensing)	20 ... 80 % r.H. (non-condensing)
Protection class (DIN EN 60529)		IP64		IP40	IP64
Material		Stainless steel, glass fiber bundle with metal-silicone sheath (T)		Stainless steel, glass fiber bundle with metal sheath (M)	Stainless steel, glass fiber bundle with metal-silicone sheath (T)
Weight		50 g	90 g	60 g	100 g
Compatibility		CFO controller (LT, WLCS, FES)			
Features		All variants are also available with different cable sheath, length 0.3 ... 2.4 m, vibration protection, IP protection, suitable for drag chains and for temperature ranges up to 2,000 °C. In combination with a pressure-tight feed-through, a stainless steel sheath and T250° bonding, vacuum applications down to 10-5 mbar are also possible.			

The specified data apply to a white, diffuse reflecting surface (zenith white reference)

¹⁾ In combination with colorSENSOR CFO200 and a repeatability of $\Delta E \leq 0.3$

²⁾ On titanium pearl mica from a distance of 30 mm

³⁾ With potted connection cable also available with IP67

⁴⁾ Valid for optimal working distance

⁵⁾ Only possible in combination with external illumination
